## Correspondence

Being the writer of the article, in which the McGregor Lake ball team's name was shortened to Fish Eaters and the Slavely aggregation shortened to Fish, with all due respect for both teams. As I am a lover of fish, I wish it understood that I am truly sorry that any offence was taken as a slur, but was written while I was in a would be humorous mood. And to those who did take offence I shall try to present a mess of fish upon my return from my next fishing trip.

ARCHIE RUGGLES

## Champion Ball Team Puts up Great Battle

On Wednesday July 20, the Champion baseball team met the Lethbridge Miners at Adams Park, Lethbridge in the first game for the White Lunch cup. The game went ten innings with a final score of 5-4 in Champion's favor. McLaren and Ray were in the points for Champion. McLaren piled up fifteen strike outs.

The second game was played at 6:30 and resulted in a win for the Miners by 5-0.

The third game of the series provided the fans with plenty of thrills. The game was a tie, 5-5 which made another game necessary.

The final game of the four-game series for the White Lunch Challenge Cup was played on Sunday afternoon before a crowd estimated at 2,000 fans. Neither team scored during the first three innings, but in the fourth the Champion team became aware of the fact that they had nine men and two umpires to beat. Consequently from this inning play lacked interest. The game ended in a score 5-0.

We understand that the White Lunch have issued a statement forbidding Kotch and Kotch umpires of above games to officiate at any of the games for the cup in the future.

Champion entered another challenge at the end of the game. The Red Sox are the next challengers, and then Milk River. If the Miners retain the cup, the game should prove very interesting.

Dick Latiff was among the eight Calgary Herald carrier boys who were awarded a trip to the exhibition and stampede as a result of winning a district circulation competition in his home town. While in Calgary the boys were guests of the Herald.

Events in which they were particularly interested included a visit to the fair grounds, a sight of the stampede programme, entrance to all the side shows and rides on the midway, a sight-seeing drive around the city and a visit to various departments of the new Herald building.

Mrs. Frank Lloyd returned to Lethbridge recently after a visit of seven weeks duration with relatives in Goreville, Illinois and Gary, Indiana. Mrs. Lloyd left the city to attend the funeral of her son, Vern Z. Lloyd, who died May 21st, at Gary. Mrs. Lloyd visited her mother while away and had the pleasure of being with her on her 76th birthday.

## Obituary

We regret that we have to report the passing of Mrs. Isabel M. Daugherty at her home in Des Moines, Washington, on Wednesday July 13th. Mrs. Daugherty was 83 years of age, having been born April 12th, 1849 in Eckford Michigan, and is survived by her husband, John G. Daugherty and a daughter, Mrs. Gertrude Gottenmyer of Saginaw Michigan.

She was actively identified with the Rebekah, Macabee and Eastern Star Lodges.

The Rev. W. Leach of Ballard, assisted by Rev. J. Barranger of Des Moines conducted the funeral service at the Crittenden Funeral Home on Friday July 15th, interment taking place in the Kent Cemetery. The Eastern Star funeral service was also read.

Mrs. Daugherty lived for a good number of years in the Champion district, where she had a large number of friends who regret her passing, and who unite in extending their condolences to Mr. Daugherty and Mrs. Gottenmyer.

## J. N. Beaubier is Honored

About twenty ladies from Champion and district agreeably surprised Mr. J. N. Beaubier on Saturday evening, July 16, when they gathered at his home in honor of his 71st birthday. The evening was spent in games, after which dainty refreshments were served. During the evening Mrs. F. C. Alcock, on behalf of the ladies, presented Mr. Beaubier with a gift and with it the best wishes for many happy returns of the day. A beautiful birthday cake, designed and executed by Mrs. J. O. Bell, was also presented to and cut by Mr. Beaubier.

## Trim the Edges of Grain Fields

There are practical as well as aesthetic reasons for trimming the edges of grain fields. Weeds often grow along them, especially if there have been little end skips in the seeding. The weeds on the edges grow strong and ripen many seeds which are carried to other parts of the field by reaping and threshing operations. Trimming the edges of the fields in July helps to keep farms clean. A trimmed field looks better than a ragged one. Squaring off the ends makes about as much difference in the appearance of a crop as a shave and hair-cut do in the appearance of a man. It gives an air of primness and the crop looks taller.

Any farmer worthy of the name is proud of a good-looking crop. The prouder he is the better he will do his work. It does not take long to run around each field with the mower. It will be time well spent. Character is judged and formed by such little things.

Mr. and Mrs. Oscar Sletto and family, Mr. and Mrs. Tom Sletto and son, Mr. and Mrs. Martin Sletto and son and Mr. and Mrs. F. Gottenberg and family, left Saturday for a holiday to the west at Spokane. The trip was made in Mr. Gottenberg's truck, which was fitted up with cushions etc. for the trip. The party camped enroute.

## NOTES AND COMMENT

World bank and League experts declare that before the nations can resume making profits from each other they must resume lending each other money. This is how the seeming paradox explains: Recovery depends on export trade and export trade must be stimulated and; balanced by foreign loans. It wasn't foreign lending that precipitated the trouble, but only the abuse of it. When lending starts, the creditor gold surplus nations will be able to sell their goods. Even enlightened selfishness seems to say, Give some, thing—if you want to get a lot back.

German customs officials find smugglers along the German-Dutch border aiding American rumrunners in their methods. The smugglers back up extremes ingeniously with guerrilla warfare. They slip into Germany no rum, but the so-called luxury articles of tobacco and coffee and the staple of wheat, on which the duties are very high. Great risks are taken because of the possibility of enormous profits. The German-Dutch border situation gives rise to a new question concerning rumrunning in America. Is the traffic due mainly to the liquor needs of the buyers—or mainly to the money madness of those who smuggle the liquor in.

As France angles for its sunken submarines Prometheus, with 60 men aboard, Britain announces an infallible method of locating motionless craft on the ocean floor. No more losing of U-boats, hope Admiralty officers. And few more U-boats to lose—hopes a world that sees promise as well as sense in things that have been soberly said at Geneva.

Washington's bonus army is faced with necessity of a quick decision. The \$106,000 provided by Congress to supply the veterans with homeward transportation will not be available after July 14. News reels are shown by way of suggesting where the jobless men may go—pictures of hundreds who have suddenly found a home by turning gold miners in the Rock Mountains and the once—and perhaps still—Golden West.

Travelling in an automobile at sixty miles an hour is three times as expensive as going at forty-five miles an hour, a research by motor experts shows, while statistics used by state patrolmen in California show that travelling twenty miles at a speed of fifty miles an hour saves only two and two-thirds minutes over a speed of forty-five miles an hour. Some motorists who seem to have learned too well that time is money may now begin to realize that a little time on the road is money in the pocket.

The measured speed of a driver when it connects with the golf ball is from 70 to 125 miles an hour, or approximately one-half the speed at which the news seems to travel in the event the ball rolls into the cup for a hole-in-one.

It has been estimated that the motorist pays one-third of a cent per mile for the use of the highways. Their abuse not infrequently runs into considerably more money.

The use of extracts from seaweed as a substitute for gelatin in jelly, for dessert, for textile paste, cleaning material; in the manufacture of gelatin for duplicating machines, as a substitute for gum arabic, and as a covering for airplane wings, may yet promote that plant out of the weed class.

## Tree Planting On Prairies Sole Remedy For Soil Drifting And The Conservation Of Moisture

Extensive tree planting alone can save Saskatchewan from the fate which has overtaken the Sahara desert, according to Capt. Richard H. Baker, who passed through Winnipeg, on his way from the Peace River country to Toronto. As late as the time of Mohammed, Capt. Baker said, the Sahara was a well-wooded and fertile area. Then came a great influx of Arabs who, like the settlers of the western plains, cut down the trees and began farming operations. The result was to convert the once rich African plains into an arid and unsettled tract, unfit for human abode.

One of the first hundred students to attend the University of Saskatchewan before the war, Capt. Baker is now completing a tour of Canada, which he had not seen for years. He was delighted with the appearance of Manitoba, where tree protection had evidently encouraged growth. But in Saskatchewan he noted the serious denuding of the plains, and based his prediction for the future upon his study of the past.

Tree planting on all rising ground, Capt. Baker declared, was the sole remedy for the soil drifting, which was resulting in a changed climate, soil drifting and desiccation. He urged upon Western Canada the adoption of the policy for forest in New Zealand, where forestry was being made to pay.

In that country one private company had already sold \$4,000,000 of "forest bonds." The money was invested in tree-planting, and it was believed that in 12½ years from the time of planting, definite return on the investment could be expected. In the interval the trees did much to conserve moisture and climate conditions. "Plant a tree and grow money" was the New Zealand slogan.

Capt. Baker said it was deplorable to see settlers in the Peace River country burning off the trees on their farms. This left an alkali deposit which was injurious to the soil. Instead, he advocated the construction of a plant for distilling alcohol from the trees, which would in time make Canada self-sufficient in motor fuel. A new carburetor was being perfected in France which could use the gas generated by burning charcoal (made of wood). The policy of tree planting was, therefore, in his opinion, not only good agricultural insurance, but was also a policy that paid actual dividends.

Capt. Baker is the founder of a society named "The Men of the Trees," headed in England by Sir Francis Youngblood, its aim being the protection and encouragement of forest growth. He is also an author and forestry expert, having recently been in equatorial Africa employed by the British Government—Winnipeg Free Press.

### Revenue From New Taxes

Saskatchewan Tax On Passenger and Freight Public Vehicles  
Saskatchewan will collect between \$20,000 and \$25,000 a year in new taxes levied on passenger and freight public vehicles.

Under public utility board regulations, the government will collect one per cent of the gross earnings of vehicles operating for hire under the jurisdiction of the new utility board.

### Fined For Shaving

Centuria, Wash., takes its whiskers seriously. Frank McDowell, a business man, was fined \$25 and his attorney \$10 in police court for violating an ordinance requiring all male residents to go unshaven until after the pioneer celebration, August 3 and 4. McDowell's only defence was "The lady friend doesn't like whiskers."

Porcupine are not related to hedgehogs.

"Pardon me, but can you let me have a light?"—Moustique, Charlevoix.

### Echo Of The War

Lloyd George Not Impressed With Value Of American Credit  
Newton D. Baker, President Wilson's secretary of war, has revealed that David Lloyd George, then Premier of Great Britain, once so warmly desired the removal of General John J. Pershing as commander-in-chief of the American Expeditionary Force in the Great War.

In a letter to Colonel Lloyd C. Griscom, former liaison officer between General Pershing and the British War Office, Mr. Baker wrote that the war-time premier complained the United States army was "perfectly useless" to the British force and was on the verge of asking for General Pershing's recall.

At the conclusion of a dinner in London in 1918, Mr. Baker wrote. Mr. Lloyd George "with vehement emphasis, complained that the United States army in France was of no service to the British and in spite of the fact that Great Britain had stripped necessary empire services of ships in order to carry United States troops to France, and that they had scarcely gotten to France before General Pershing pulled them away from the British and took them into his own custody on another part of the line.

"This description was most embarrassing to me," Baker said in the final declaration of Lloyd George that so far as Great Britain was concerned the American army was perfectly useless and the ship service failed to bring them over wasted."

Mr. Baker replied that from his own observation on the front lines he was convinced that the American troops were "at least detaining that many German divisions which might otherwise be added to the concentration against the French and British."

He countered with an offer to discontinue the transportation of American soldiers on British ships and carried on American vessels.

The next morning, Mr. Baker recalled, Lord Reading, former viceroy of India, said that Mr. Lloyd George "asked me to say to you that you should think no more about the matter which he raised for discussion last night at dinner."

### The Pendulum Clock

A pendulum clock gained, owing to the increase of gravity with latitude, about one minute and twenty seconds a day when taken from Ottawa to the south of Mackenzie River, North West Territories, by an official of the Dominion Observatory. Department of the Interior, in connection with gravity work. Taken to a height of about five thousand feet up a mountain side in British Columbia it lost about thirteen seconds daily.

### Well Covered

"I'm sorry," said the diner who hoped to get away with it, "but I haven't any money to pay for that meal."

"That's all right," said the cashier. "We'll write your name on the wall and you can pay the next time you come in."

"Don't do that. Everybody who comes in here will see it."

"Oh no they won't. Your overcoat will be hanging over it."

A hydro-electric station is to be constructed on the Jordan river.

### KING'S GRANDSON TRIES HIS LUCK

Albury, Australia, has banned all dog racing.

Turnip sauerkraut is a new, appetizing food.

Sharks are cannibals of the sea, feeding on their fellows when conditions are favorable.

A suggestion for dental attention—Mocha, Warsaw.

Helpful Evidence  
A critical moment in a court case has arrived.

Counsel for defence rose and pointed his finger at the man in the witness box.

"Now, sir," he commenced, "the whole evidence hangs on the destroyed letter. Think before you answer. What did the postmark say?"

The witness went through the actions of deep thought.

"I remember," he said at last. "The postmark said: 'Every home needs a telephone.'"

Hon. Gerald Laseelles, son of the Princess Royal and grandson of King George, was caught by the camera as he tried his luck at the Marlborough House Garden Party. He is fishing for prizes in the "pond" and must land a tin fish with his magnetic hook to be in the money.

361

### UNDOUBTED SLIMMING LINES AND CHIC

Suitable for normal as well as larger figures.

Seldom is a dress so smart and so slenderizing at the same time.

It has a subtle air of youthfulness that bows at the opposite shoulder that does it.

In the original dress of black and white crepe silk with the reverse collar was of white crepe silk. The vest, belt and buttons were also of the white crepe. The scalloped outline at the lower of the revers is particularly stylish and minimizes body breadth.

This dress in plain navy blue crinkle crepe silk with white trim is most effective.

Style No. 361 is designed in sizes 36, 38, 40, 42, 44, 46 and 48 inches bust. Size 36 requires 3½ yards of material with ½ yard of 3½-inch contrasting.

Blaque prints, sheer linen twill, sportswear linen and tub silks are smart for summer wear.

Price of pattern 25 cents in stamps or coin (cash is preferred). Wrap coin carefully.

## New Photographic System Developed In London May Mean Virtual Revolution Of Art

### Songs Of Yesterday

Old Favorites Have Strong Appeal In This Modern Age

It used to be the theory of those who contrasted radio programs that music composed farther back than the day before yesterday was old-fashioned and unattractive to the demands of an up-and-coming age. Now the program managers are less sure of themselves and of the public taste. The directors of a feature called "Today and Yesterday," offered by a New York station, invited their audience to specify their favorite music. Six thousand replies were received, 614 songs were suggested, and first choice, with 513 ballots was none other than our old friend, "Billie Thelma Among the Girls," written 60 years ago and enjoyed by every generation since that time.

Of the seven songs receiving the largest number of votes five were old and only one was really new. Second place was won by the fine old ballad, "When you and I Were Young, Maggie," which was written in 1840. "Paradise," a melody of 1880, was third in the voting; fourth was "Olden Days," composed five years ago; and then came "Let Me Call You Sweetheart," written in 1910; Chauncy Olcott's "Wild Irish Rose," which dates back to 1897; and Carrie Jacobs Bond's "Perfect Day." In the other 607 songs mentioned, the old and tried favorites predominated, we are told, among the young members of the "unseen audience" as well as representatives of the older generation.

Broadcasting stations which have taken a liking to preferences in the matter of instrumental music had similar experiences. They are told, among the young members of the "unseen audience," as well as representatives of the older generation.

Science is ever amazing the individual. No sooner does one marvel at human nature than it becomes a commonplace beside its successor, until it seems that the world could be surprised no more. Yet scientists have many more miracles up their sleeve. One has just been revealed in London that appears to be a virtual revolution in photographic art. It is nothing more or less than the photography of the invisible. A camera was set up in Old Park, Dover, and despite the fact that has hid the French coast from view, the printed picture showed a vast range of that coast in extraordinary detail.

The importance of this achievement in photography can hardly be overestimated. It simply means that whereas the photographer has hitherto been at the mercy of the weather, he can now disregard both rain, mist and haze, and go ahead with his work as though they did not exist. The new system enables the camera to penetrate both mist and haze and to photograph distant objects and scenes with such detail as though the atmosphere prevents the photographer from seeing with his own eyes, while the camera is actually in the atmosphere were absolutely clear.

The explanation of the new process is so simple that even the unpracticed layman can grasp it easily. One reason why we cannot see far in misty or hazy weather is because the light is scattered, or diffused, by the humidity in the atmosphere, and the scattered on a fine day, but red light is scattered less than blue and the problem has been to use the infra-red light in the atmosphere and to exclude all other light. This has been accomplished by using a piece of dyed gelatine in front of the camera lens as a filter. This permits the proper rays alone to penetrate and to carry the image to be photographed with this. This infra-red light is invisible to the naked eye, but infra-red sensitive plates are responsive to it, and by their use and the use of the filter photographs can be taken with a telephoto camera of scenes which the naked eye cannot see.

What fascinating vistas are thus possible to the photographer may be imagined. A new art has in effect been created by this simple invention which achieves so marvellous a result. Its bearing in other fields than those of art is easy to indicate. It may, for instance, play a highly important part in aerial photography, and also in pictures taken for defence purposes. More thoroughly exercised control of aerial photography is likely to follow as a natural corollary. But in so far as the art photographer is concerned, he now has a new resource from which he may draw hitherto unimagined beauties for the decoration of those who love nature in all its forms.—Montreal Star.

More thoroughly exercised control of aerial photography is likely to follow as a natural corollary. But in so far as the art photographer is concerned, he now has a new resource from which he may draw hitherto unimagined beauties for the decoration of those who love nature in all its forms.—Montreal Star.

What fascinating vistas are thus possible to the photographer may be imagined. A new art has in effect been created by this simple invention which achieves so marvellous a result. Its bearing in other fields than those of art is easy to indicate. It may, for instance, play a highly important part in aerial photography, and also in pictures taken for defence purposes. More thoroughly exercised control of aerial photography is likely to follow as a natural corollary. But in so far as the art photographer is concerned, he now has a new resource from which he may draw hitherto unimagined beauties for the decoration of those who love nature in all its forms.—Montreal Star.

# The 40th Anniversary of "G.I. TEA"

For 40 years SALADA has given the finest quality in tea. Present prices are the lowest in 15 years.

## Restoring World Confidence.

The signing of the Lausanne treaty on July 9 by all the great European powers, whereby all the German war reparations were wiped out, and providing instead that Germany shall pay in one lump sum an amount which represents one cent for every dollar demanded by the Allies after the close of the war, marks a new and an important forward step in the direction of establishing the peace of the world and in restoring the economic health of all nations.

Apart altogether from the specific agreements set forth in this historical document, and the gains thereby conferred upon a long suffering world, the fact that the great European powers, and more especially Germany and France, have at last met on common ground, and have signed a treaty as a result of consultation and compromise rather than one forced by one upon the other, is one of the most hopeful occurrences for many years.

Since the signing of the Peace Treaty, and the imposition of a war indemnity on Germany totalling the huge and impossible sum of \$65,000,000,000, together with many other harsh penalties, nothing but bitter feelings have prevailed on the continent of Europe. Physical warfare has been followed by an ever intensified economic warfare; fortifications and barbed wire trench entanglements, cannon and machine guns have been succeeded by high and ever higher walls. Education has been determined to have as little trade intercourse with its neighbors as possible; each was endeavoring to economically strangle the other. Each was suspicious of and feared the other. Each demanded security from the others. Thus Europe was deadlocked, trade stagnated, all people suffered, and warlike armaments steadily increased despite all efforts to reduce and control them.

Seriously interminable "conversations" took place between various nations, international conference followed conference without any tangible results being achieved until confidence in the world's political health and even in our existing institutions of government, was more or less shaken. Even in Western Canada leaders of certain parties and groups openly predicted the failure of this last treaty. This loss of confidence was, indeed, the world's greatest loss because it was shattering all hope of success and a way out of our difficulties being found.

The signing of the Lausanne treaty refuted the prophecies of these pessimists. It demonstrated that our statements of despair in the past, patriotism, or diplomacy. It has once again proven that there is always a way out if patience, persistence, tact, coupled with determination, and a will to succeed is in evidence.

To Premier Ramsay MacDonald belongs the chief credit for this great achievement. He refused at all times to recognize the possibility of failure. When the probability of getting France and Germany to agree seemed most remote, when consultation followed consultation without results, Ramsay MacDonald kept up the good fight until finally he succeeded in bringing these two historic enemies together. Justly deserved were the warm congratulations extended to him by King George. The whole world owes him a debt of gratitude. He has restored confidence in the democratic institutions of government throughout the world, and has thereby paved the way for further successes at future conferences.

Besides wiping out the war reparations of \$65,000,000,000 which Germany was obligated to pay, the Lausanne treaty has wiped out a lump sum of \$650,000,000 to be paid when Germany can sell bonds for that amount. The Lausanne treaty declares suspension of collection and payment of inter-European war debts for a time; it includes an agreement to assist Austria and the Danubian states which are in financial straits and whose prosperity is closely linked with that of Germany; it creates a committee to study the grain problem in the Danubian states which are embarrassed by a huge surplus; and it creates machinery for a world economic conference under the auspices of the League of Nations, in which all nations, including the United States, will participate.

The Lausanne conference did not accomplish everything that some people hoped of it. It did not succeed in making tremendous strides along the road to world betterment and a restoration of conditions which it is essential should be restored before there can be a return to world confidence, world trade, world prosperity. Had that conference ended in failure, the outlook would have been dark indeed, whereas the large measure of success achieved not only means an immediate betterment, but makes possible the further coming together of the nations in a better, more hopeful, more friendly spirit to consider other problems, such as disarmament, tariff barriers, international currency problems, and other vexatious subjects.

The world outlook is distinctly better because Ramsay MacDonald stuck to his principles and unflinchingly fought for a return to reason and world brotherliness at Lausanne.

### Another Link in Highway

Another link in the All-Canada automobile highway from coast to coast was completed with formal opening of the section connecting the provinces of Manitoba and Ontario on July 1st. The section just completed is 145 miles long and runs through a country of great scenic beauty adjoining the Lake of the Woods.

Canton, China, has just completed its new water way.

### FOR SALE

From Grower Direct to Consumer. Save Your Money and Buy the Best. RASPBERRIES PER CASE \$2.75. LOGANBERRIES PER CASE \$2.75. BLACK CURRANTS " " 1.75. CRANBERRIES PER CASE \$2.75. FRESH DRIED FRUIT. PER CASE \$7.00. F.O.B. Shipping. Delivered. P.O. Box 164, Vancouver, B.C.

### PERSONAL

SCOTTISH LADY AT PRESENT IN Canada, would like to take in charge one or more young ladies. Has experience in travel abroad, and has Canadian girls could act as companion to lady, in any part of Canada, or as travel companion. Has excellent testimonials both in Canada and Britain. Would willingly give more information to interested party. Apply Box 50, Winnipeg, or Newspaper Union, 170 McDermott Ave., East, Winnipeg, Man.

### Dangers of the Submarine

Long List Of Disasters Shows Many Lives Lost

Submarine disasters in the past ten years or so have claimed a large toll of lives. In connection with the sinking of the French underwater ship, with 66 men aboard, the following list has been prepared:

March 24, 1915—United States submarine F-4 sunk in Honolulu Bay, 21 dead.

March 23, 1922—British submarine sunk by another British submarine off Gibraltar, 33 dead.

August 21, 1923—Japanese submarine stranded beside a dock at Kobe, Japan, 283 dead.

January 10, 1924—British submarine L-21 sunk by a British battleship off Portland, England, 83 dead.

March 19, 1924—Japanese submarine S-31 sunk off Block Island, N.I., by steamer "City of Rome," 33 dead.

December 17, 1927—United States submarine S-4 sunk off Provincetown, Mass., by coastguard cutter, 40 dead.

August 6, 1928—Italian submarine F-14 sunk in Adriatic Sea in collision with destroyer, 31 dead.

July 9, 1929—British submarine H-17 sunk in St. George's Channel, between Ireland and Wales, in collision with submarine L-12. Heavy death toll.

June 9, 1931—British submarine Poseidon sunk in collision with merchant steamer off coast of China, 20 dead.

October 24, 1931—Russian submarine sank in Gulf of Finland, 50 dead.

November 11, 1925—British submarine M-4, sister ship of the M-2 lost off Start Point, Devonshire, 68 dead.

January 26, 1932—British submarine M-2 sunk off Portland Bill, England, 61 dead.

### Further Reduction Of Sea Forces Proposed

Great Britain Launches Move At Geneva For Conference

Great Britain has launched a move for another five-power naval conference aimed at further reduction of sea forces.

The proposal for a five-power naval conference between Britain, the United States, Japan, France and Italy was advanced by a high British authority in a press interview.

He proposed that it be held in the near future, before the world disarmament conference resumes its activities in the fall.

### To Build New Bridge

Preliminary Work On Bridge Over South Saskatchewan River

Progress is being made on the construction of approaches to a new bridge over the South Saskatchewan River at Outlook, according to H. R. Mackenzie, chief engineer of the Department of Highways. The work is being done as a relief measure.

Though there is little likelihood of any work on the bridge itself being started this year, soundings have been taken preparatory to selection of the site of the bridge and work on the approaches started.

### Telephones For Pin Flon

The most northerly and at the same time the most modern telephone system in Manitoba is being installed in Pin Flon. It will be ready for operation next month. For nearly two years Pin Flon has had connection with the outside world by wireless and later a wire telephone, but there has been no local system.

### Death Of B.C. Legislator

Death has claimed one of the oldest and most popular members of the British Columbia legislature in the person of Michael Manson, Conservative member for the constituency of Mackenzie. Born in the Shetland Islands in 1857, Mr. Manson came to Canada in 1874, and first entered the legislature in 1909.

Tax officers in Hainan, China, must pay a tax of \$15 a month per car plus half of the gross receipts.

Canada mined 2,212,000 tons of coal last year.

Florida has 5,113 miles of drainage ditches.

**DR. HAMILTON'S**

HEADACHE  
INDIGESTION  
BILIOUSNESS  
CONSTIPATION

Persons laboring are inevitably chosen by disordered bowels. Delicately to use. Subly fragrant. Cooling and refreshing. Imparts a rare youthful charm to the complexion. Invaluable for softening and making hands flawlessly white. Tones and beautifies the skin. Useful for the family also. Protects the tender skin of the children and is excellent for the father as a hair fixative and cooling shaving lotion.

Rayon yarn production in Japan in a recent month totalled 5,000,000 pounds.

## Summer Complaint

"I have found Baby's Own Tablets the best of all children's remedies for Summer Complaint, Colic, Teething and Constipation," writes Dr. Walker, Thomasburg, Ont. Certificate of S.A.F.E.T.Y. in each box package. More than 100,000 packages sold in 1931.

**BABY'S OWN TABLETS**

### Power Of Advertising

One Of The Indispensable Tools To The World In Reconstruction Of Industry

Advertising is one of the indispensable tools to be used in the reconstruction of North American industry, was the keynote of an address to the convention of the Pacific Advertising Clubs Association, at Vancouver, by George W. Kincaid, of Boston, who organized the Gillette Safety Razor Company in 1901.

His Los Angeles representative transactions were among the largest ever recorded here.

Educated in Chicago, Mr. Gillette became a salesman and later London branch manager for a bottle-topper company. After conceiving the thin, sharp blade to overcome the risk of straight-edged shaving, he devoted five years to evolving a holder.

The razor was launched as a commercial product in 1903. Only 600 razors were sold that year, but annual sales of as many as 15,000,000 razors and 1,000,000,000 blades followed.

Mr. Gillette was born in Westford, Mass., Jan. 8, 1855. His father, George Wolcott Gillette, was an inventor before him. His mother wrote "The White House Cook Book."

The first Dominion Day celebration was held in 1901.

It is sixty-five years since Canada held her first Dominion Day celebration yet there are men still living in every municipality throughout the Dominion who remember that event.

All Canadians of seventy years and over should remember it. The day was marked with few exceptions throughout all the land, the weather, giving to the new-come among the immigrants a warm and generous reception. There were many regiments of red-coated volunteer soldiers in Canada, and they were all on parade that day, and tons of goods were poured out from their bodies into the good red cloth made by honest British toil. But every volunteer was proud of his red coat, and did a lot of strutting in it that day in spite of the heat.

There are still to be found in many of the old family albums, pictures taken on the first Dominion Day, which show that our mothers and grandmothers, were amply clothed with garments that would hide defective limbs and misshapen bodies. It was a religious age, and had pity for the misshapen and deformed.

A Power Of Its Own.—Dr. Thomas' Electric Oil has a subtle power of its own. It has been used in the past and kept by it them as the most valuable medicine available. Its uses are numerous and for many years it has been prized as the leading liniment for man and beast.

Cliff Deflects Comers. Adventurers usually clear of the Hare Mountains near Eisenburg, Germany, because the "lineated" valley, may be some 250 feet high, possesses magnetic qualities. It deflects the compass almost 180 degrees at its summit.

The "mite," a coin in use during the Middle Ages, was worth about one-quarter cent.

Cocaine is obtained from the leaves of the coca plant.

Many physicians

Economic Conditions Of Profession Being Lowered, It Is Stated

Too many physicians are being turned out in Canada with the result the economic condition of the medical profession is being lowered, declared Dr. J. M. McCallum, Victoria University, B.C., addressing the British Medical Association of Physicians and Surgeons College at Toronto.

Dr. W. Frankle, Wolfe Island, had pointed out 323 students were up for the Dominion council examination and only five were "plucked" and 42 others "referred" because they failed in one or two subjects.

Persons laboring are inevitably chosen by disordered bowels. Delicately to use. Subly fragrant. Cooling and refreshing. Imparts a rare youthful charm to the complexion. Invaluable for softening and making hands flawlessly white. Tones and beautifies the skin. Useful for the family also. Protects the tender skin of the children and is excellent for the father as a hair fixative and cooling shaving lotion.

Rayon yarn production in Japan in a recent month totalled 5,000,000 pounds.

### Noted Inventor Passes

Death Of Mr. Gillette, Of Safety Razor Fame, At Los Angeles

King Camp Gillette, who perfected the double-edged safety razor blades, died recently at Los Angeles, at the age of 77.

The inventor and manufacturer succeeded after undergoing several operations during two years for an intestinal malady.

He went to California nearly 20 years ago from Boston, where he organized the Gillette Safety Razor Company in 1901.

His Los Angeles representative transactions were among the largest ever recorded here.

Educated in Chicago, Mr. Gillette became a salesman and later London branch manager for a bottle-topper company. After conceiving the thin, sharp blade to overcome the risk of straight-edged shaving, he devoted five years to evolving a holder.

## Keep Well with Eno's Help

If you are healthy, take ENO... When you are not well, take ENO, for in most cases the beginning of all ailments is in the intestinal tract. ENO'S "Fruit Salt" rids the intestinal tract of all the accumulated poisonous waste matter. Be ENO conscious. Start taking ENO'S "Fruit Salt" to-day.

**ENO'S  
FRUIT SALT**

## THE HOUSE OF DREAMS—COME TRUE

BY MARGARET FIEDLER  
Author of  
"The Splendid Thing," "The Hermit  
of the Red,"  
Hodder & Stoughton, Ltd., London.

CHAPTER XXV.—Continued

"I see. Very well. I'll come to Okehampton by the three train tomorrow afternoon," repeating his instructions carefully.

"Right. That's all fixed, then." "Quite. Mind you also fix a fine day—or night, rather. Goodbye."

A murmured farewell came back along the wire, and then Jean, replacing the receiver of his clip, ran to apprise Lady Anne of the arrangements made.

Lady Anne looked up from some large charity accounts which were puckering her smooth brow to smile approval.

"How nice, dear! Quite a charming plan—you'll enjoy it. Especially as there will be nothing to amuse you here tomorrow. I have two village committees to attend—'Em in a chair, so I must go. And please, I know, I looked for a busy day with the estate agent, while Nick is going down to South Devon somewhere for a day's fishing. I think he goes down tonight. Really, it's quite unusually lucky that Judith should have fixed on tomorrow for her month-long party."

CHAPTER XXVI.

Moontide on the Moor

The moonlight, warm with its subtle fragrance of gorse—like the scent of peaches when the sun is shining on them—tonic with the faint tang of salt borne by clean winds that had swept across the Atlantic, came to Jean's nostrils crisp and sparkling as a draught of golden wine. Before her, mile after mile by the white road—a word of civilization cleaving its way remorselessly across the green wilderness of moor, turf, and on either side the low, rolling hills and jagged peaks of the great moor, melting in the far distance into a vague, formless blur of purple that might be either cloud or tor as it merged at last into the dim haze of the horizon.

"Oh, blessed, blessed Moor!" exclaimed Jean. "How I love it! You know, half the people in the world haven't the least idea what Dartmoor is like. I was indulging to a woman about it only the other day and she actually said, 'Yes, Dartmoor. It's quite flat, I suppose, isn't it?'" "Flat?" with sweeping disgust.

Burke, his hand on the wheel of the big car which was eating up the miles with the facility of a sea-constrictor swallowing rabbits, smiled at the indignant little snuff with which the speech was concluded.

"You don't look dead levels, then?" he suggested.

She shook her head.

"No, I like hills—something to look up to—to lean on."

"Spiritual as well as temporal?"

She was silent a moment.

"Why, yes, I think I do."

He smiled sardonically.

"It's just that terrible angelic tendency of yours I complain of. It's too much for any mere material man to live up to. I wish you'd stop down

to my low level occasionally. You don't seem to be afflicted with human passions like the rest of us"—he added, a note of irritation in his voice.

"Indeed I am!" Jean spoke impulsively, out of the depths of that inner, almost unconscious self-knowledge which lies within each one of us, dormant until some lance-like question pricks it to spontaneous affirmation. She had hardly heeded whether the conversation was tedious, and she regretted her frank confession the instant it had left her lips.

Burke turned and looked at her with a curious speculation in his glance.

"I wonder if that's true?" he said consideringly. "If so, you're still asleep. I'd give something to be the one to rouse them."

There was the familiar, half-buried quality in his voice—the sound of something held in leash. Jean sensed the danger in the atmosphere.

"You'll rouse one of them—the quite ordinary, commonplace one of us, I think. If not like that," she replied prosaically. "You've got to play fair, Geoffrey—keep the spirit of the law as well as the letter."

"All's fair in love and war—as I told you before," he retorted.

"Geoffrey"—indignantly.

"Jean!" mimicking her. "Well, we won't quarrel about it now. Here we are at our journey's end. Behold the carriage drive!"

The car swung round a sharp bend and then bumped its way up a roughly-made track which served to link a species of cobbled yard, constructed at one side of the bungalow.

On the road along which they came, and rising sternly between crumbling, overhanging banks, fringed with coarse grass and dotted with straggling bushes of gorse and heather, debouched on to a broad plateau. Here the road below was completely lost. The road on all sides stretched only a limitless vista of wild moorland, devoid of any sign of habitation save for the bare, creperous walls of the bungalow itself.

As the scene unfolded, Jean became conscious of a strange sense of familiarity. An inexplicable impression of having seen the place on some previous occasion, of familiarity with every detail of it—even to a recognition of its peculiar atmosphere of loneliness—took possession of her. Only she knew that it was associated in her mind with something disagreeable. Even now, as at Burke's dictation, she waited in the car while he entered the bungalow from the back, passing through in order to admit his key by way of the front door, which had been opened from the inside, she was aware of a feeling of intense repugnance.

And then, in a flash, recollection returned to her. This was the house of her dream—the nightmare vision which had obsessed her during the hours of darkness following her first meeting with Geoffrey Burke.

There stood the solitary dwelling, set amid a wild and desolate country, and one side of it grew three

pitched-roof, scrubby little fir trees, all of them bent in the same direction by the keen winds as they came sweeping across the Moor from

the wide Atlantic. Three Fir Bungalows! Why, the very name itself might have warned her!

Her eyes fixed themselves on the green-painted door she knew quite well what must happen next. The door would open and reveal Burke standing on the threshold. She watched it with fascinated eyes.

Presently came the sound of steps, then the grating noise of a key turning stiffly in the lock. The door was flung open and Burke strode across the threshold and came to the side of the car to help her out. Jean waited, half terrified by his first words. Would they be the words of her dream? She felt that if he came to say jokingly, "Will you come into my parlour?" she should scream.

"Go straight in, will you?" said Burke. "I'll just run the car round to the garage and then we might as well get tea ready before the others come. I'm starving, aren't you?"

The spell was broken. The everyday commonplace words brought with them a rush of overpowering relief, sweeping away the dreamlike sense of unreality and terror, and as Jean nodded and responded gaily, "Absolutely famished," she could have laughed aloud at the ridiculous fears which had assailed her.

The inside of the bungalow was in charming contrast to its somewhat forbidding exterior. The living-rooms, furnished very simply but with a shrewd eye to comfort, communicated one with the other by means of double doors which, usually left open, avoided the cramped feeling that the comparatively small size of the rooms might otherwise have produced, while the two lattice windows which each boasted were augmented by French windows opening out to a verandah which ran the whole length of the building.

Jean, having delightfully explored the front portion of the bungalow, joined Burke in the kitchen, guided thither by the clinking of crockery and the cheerful crackle of a hearth fire awakened into fresh life by the scientific application of a pair of bellows.

"I had no idea you were such a domesticated individual," she remarked, as she watched him carefully warming the brown earthenware teapot as a preliminary to brewing the tea while she busied herself making hot buttered toast.

"Oh, Judy and I are independent up here, I assure you," he answered with pardonable pride. "We never bring any of the servants from Willow Ferry, but the house-keeper, Mrs. Brown, comes over every morning to do the 'chores'—clean the place, and wash up the dishes from the day before, and so on. But beyond that we are self-sufficient."

"Where does your woman come from? I'd like to see a house for miles round?" The occupation, said an official statement, is a measure of defence which Norway has been forced to take, Denmark having given police authority to its expeditions to Greenland this year. The statement also said that in late years Danish authorities have tried to close west Greenland to foreigners and thus prevent whalers and fishermen working in the open sea from calling at Greenland ports for water.

"There, that's ready," she announced at last. "If so be Judy and I will arrive soon. Hot buttered toast spoils with keeping, it gets all sodden and tastes like underdone soft leather. Do you think they'll be long?"

Burke took a glance at the grandfather's clock ticking solemnly away in a corner of the kitchen.

"It's half-past four," he said disbelievably. "Don't think we'll risk that luscious-looking toast of yours by waiting for them. I'm going to brew the tea; the kettle's boiling."

"Won't Judith think it horrid of us not to wait?"

"Oh, Lord and Judy and I never stand any ceremony with each other. Any old thing might happen to delay them a bit."

Jean, frankly hungry after her spin in the car through the invigorating moorland air, yielded without further protest, and she resolved itself into a jolly little "tete-a-tete" after partaken of in the shelter of the verandah, with the glorious vista of the Moor spread out before her delighted eyes.

Burke was in one of those frothy moods of his when never failed to inspire her with a genuine liking for him—when the usually reserved devil within him, so hardly held in check, was temporarily replaced by a certain spontaneous boyishness and a distinctly endearing quality—that "little boy" quality which, in a grown man, always appeals so irresistibly to any woman.

The time slipped away quickly, and it was with a shock of astonishment that Jean realized, on glancing down at the watch on her wrist, that it was an hour and a half had gone by while they had been sitting chatting on the verandah.

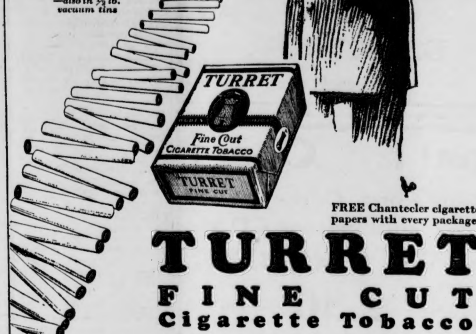

## It does pay to "ROLL YOUR OWN"

From the standpoint of economy—each 25c. package of Turret Fine Cut contains the makings for at least 50 cigarettes—and Chantecler cigarette papers free.

From the standpoint of real smoking pleasure, there's nothing like rolling your own with the smooth, mellow, fragrant Virginia tobacco that you get in the Turret Fine Cut package.

It does pay to roll your own with Turret Fine Cut.

15c. and 25c. packages  
valued at 15c. 10c. vacuum tins

FREE Chantecler cigarette papers with every package.

## Little Helps For This Week

"My voice shall Thou hear in the morning, O Lord.—Psalms v. 3.

Lord, in Thy light, oh, let me walk this day.

By Thy love prompted, act, and speak, and pray.

As a new creature it becomes to do, Whence sin is, in all his words and ways.

To be daily daily his Creator's praise, And new in heart, in life be also

—Lyra Domestica.

From the night our spirit awakens unto Thee, O God! for Thy precepts are a light unto us. Teach us, O God, Thy righteousness, Thy commandments, and Thy judgments. Kindle the eyes of our mind that we sleep not in sin unto death. Drive away all darkness from our hearts. Vouchsafe us the Sun of righteousness.

Guard our life from all reproach by the step of Thy Holy Spirit. Guide our steps in the way of peace. Grant us to behold the dawn and the day with joyfulness, that we may send up our prayers to Thee at eventide.—Thomas A. Kempis.

## New Form Of Illumination

A new light has been invented which, it is said, may soon change the history of electric lighting. The illumination is produced by carbon dioxide gas, introduced into clear glass tubes under proper electric current, produces a steady white light having all the qualities of daylight. Carbon dioxide gas is not poisonous as is carbon monoxide gas, used for heating and illuminating.

Remove all callouses and enlargements from your stock with Douglas's Epsom Liniment, a wonderful remedy.

Cotton and cotton goods led in merchandise exports from the Philippines last year.

Plaster of Paris is made by heating gypsum, a chalk limestone, in a kiln.

## "LOCK YOUR DOOR ON BIRTHDAYS!"

SAYS  
HUGH TREVOR

Famous Screen Star

"The woman who wants to win and hold adoration should keep youth."

"Grig and screen stars."

HUGH TREVOR, though the admiration they have won after years, Birthdays don't matter at all. And nowadays other women and learning their complexion secret!"

To keep youthful Europe, they remain young, charming and magnetic, with Lux Toilet Soap, the famous 60-cent bottle. In Hollywood alone are devoted to it.

That is why Lux Toilet Soap is the official soap in the dressing rooms of all the great film studios! Your skin will respond to it. Too! The career of a dollar-a-week French soap for just the sake!

FRANK DUNN, B.O.H. star, in Hollywood—on Broadway—in Europe, they remain young, charming and magnetic, with Lux Toilet Soap, the famous 60-cent bottle. In Hollywood alone are devoted to it.

That is why Lux Toilet Soap is the official soap in the dressing rooms of all the great film studios! Your skin will respond to it. Too! The career of a dollar-a-week French soap for just the sake!

## Pains In Stomach and Bowels So Bad Would Have To Sit Down

Mrs. C. Lamley, Moncton, N.B., writes:—"I can certainly recommend Dr. Fowler's Extract of Wild Strawberry for cramps or pains in the stomach and bowels."

"Last Summer I had such awful pains in my stomach, and lower part of my bowels, that I could hardly get up. I took Dr. Fowler's, and was soon relieved."

"When my children were small I always kept a bottle in the house and it helped them wonderfully whenever any of them had bowel complaints."

Try Lydia E. Pinkham's Vegetable Compound

Another "Worn-Out" to go

Too Ache Backs... Couldn't stay on her feet a minute longer! Lydia E. Pinkham's Vegetable Compound relieves cramps. Try it next month.

Real jewels again are vogue in London.

## FOR THE FREER INTERCHANGE OF OUR PRODUCTS

Victoria, B.C.—The empire "down under" swung its forces up into Canada determined that Ottawa shall be the foundation of a greater commercial commonwealth, prosperous with itself and leading the rest of the world back to economic re-establishment.

"It is unthinkable that it should fail," declared Rt. Hon. Stanley M. Bruce of the Australian delegation, concerning the imperial conference.

"The immediate question is whether our empire can, by common effort, reverse the trend and set us moving instead in the direction of the free interchange of our products," said Rt. Hon. J. C. Coates of New Zealand.

Declaring development of intra-empire trade the immediate objective, Hon. H. S. Gullet, Australian Minister of Trade and Customs said: "The improvement of trade in the empire means towards the greater objective, which is to increase empire production, to stimulate every kind of empire enterprise, to provide more employment and as prosperity comes back to the world, to bring about a more economic distribution of the empire's white people."

"At this stage our chief joy and satisfaction is being on Canadian soil and meeting Canadian friends," said Hon. Downie Stewart, Minister of Finance and Customs, who, crippled in the war, sways the financial destinies of New Zealand from an invalid's chair.

Hon. A. W. Seymour, colonial secretary, arrived with the party, to represent the Fiji Islands.

### Forest Ranger Murdered

Assailants Kill Government Official and Also Wound His Wife

Rosbush, Man.—Lawrence Lees, young Dominion forest ranger, is dead, and his pretty bride of five weeks lies in Clear Lake hospital tonight as the result of a murderous raid on a forestry station in Riding Mountain forest reserve 14 miles north of here.

The ranger was murdered when unidentified assailants fired through the window of the station, the shot piercing his neck.

A few minutes later the slayers entered the cabin as Mrs. Lees was telephoning police officials. They ruthlessly shot her dead, the bullet striking the back of her neck.

### Taking Supplies To Northern Trading Posts

Pilot Buchanan, Veteran Aviator Making Trip To The Barrenes  
Churchill, Man.—Taking off from the harbor here, Pilot W. J. Buchanan, a northern aviator, headed northwest, into Windy Lake region with supplies for the trading posts on the barrenes. He is flying a Junkers low-wing monoplane of the Canadian Airways. The craft has three ton capacity and a speed of 100 miles an hour. Pilot Buchanan was accompanied by Dave Glenn and Tom Gilmore, mechanics.

### Bracken Elected

The Pas.—Premier John Bracken was returned as the representative of 'The Pas' in the Manitoba legislature on the basis of incomplete returns, and with four polls reported in Rupert's Land. Only small scattered polls in the northwestern part of the main unreported and the results in them cannot overcome Mr. Bracken's lead.

### Will Not Affect Canada

Ottawa, Ont.—The decision of the Norwegian government to occupy a strip of territory in Greenland is regarded only with academic interest here. The matter does not affect Canada, nor has it any bearing on Canada's suzerainty over the islands of the eastern Arctic. Greenland has always been regarded by the Canadian government as Danish territory.

### Unemployment Problem

Vancouver, B.C.—Taking exception to the British Columbia Government's proposed new direct relief plan, the executive of the Union of British Columbia Municipalities meeting here decided to apply direct to Ottawa for a federal representative to study the unemployment relief problems of the province.

W. N. U. 1951

### Duty On Free State Goods

Canada Stands To Benefit From Imposition Of New Levies  
London, England.—The British government has carried out its threat to levy fresh duties on goods from the Irish Free State. The revenue from the new duties will recoup the British treasury for the losses consequent on the Free State's default of land annuities.

The government's special measure, passed by parliament gives the government the power to levy up to 100 per cent. ad valorem on Free State goods.

The Irish Free State committee on which the new duties apply are principally livestock, poultry and game, butter, eggs and corn, bacon and pork.

There were reports the Canadian livestock trade in particular was already experiencing some benefit from the setback for the Irish exporters.

### Need Of Action

Want No Prolonged Preliminary

London, England.—Turning towards Canada at the present time, Lord Rothermere, English newspaper magnate, is being no opportunist to stress the importance of the Imperial Economic Conference at Ottawa.

His Daily Mail will feature a cable sent by Lord Rothermere from Calgary with the caption "Ottawa Must Dare and Act." He declares the empire "wants action."

"If the delegates engage in prolonged preliminary palaver the conference will be choked in its own verbiage," Lord Rothermere says.

He declares that Canada can purchase within the empire £50,000,000 worth of goods annually that she is now getting from outside the empire.

### Ban On Saloon

Proposal Of U.S. Senator For Repeal Of 18th Amendment

Washington.—A resolution proposing a new constitutional amendment, repealing the 18th amendment, but outlawing the saloon, was introduced in the United States senate by Senator Carter Glass of Virginia.

One of the leading supporters of prohibition.

Senator Glass asked for immediate consideration of his resolution, but this was blocked by Senator Norris, Republican, Nebraska.

The constitutional amendment proposed by the Virginian would allow states that want liquor to have it, but would keep the saloon unconstitutional. It also would prohibit transportation of liquor into states where it was forbidden.

### Americans Hoard Cash

Stated That Billions Of Dollars Withdrawn From Circulation

University, Va.—Five hundred million dollars in "centuries and grand" has been withdrawn from circulation in the United States by members of the underworld since Al Capone was arrested, and the seaborne investigation was started, Robert Warren, economist, told the Virginia Institute of Public Affairs.

He estimated that Americans are hoarding \$2,000,000,000 in cash. This was withdrawn mostly in hundred, thousand and ten-thousand-dollar bills.

### Plan Another Flight

Round The World Flyers May Make Second Attempt

Oklahoma City.—The possibility has arisen that Bennett Griffin and Jimmie Mattern, who try ended in a Russian post bag, may step off the boat and into another "plane" for a second attempt when they come back from Europe.

Efforts to have the second "plane" available in New York are being made by Clarence Page, the flyers' business manager, Page said.

### Subsistence For Peace Park

Dunsmuir, N.D.—Canada and U.S. clasp hands on the international boundary in Turtle Mountain Peace Park to commemorate the long friendship of their peoples. A \$5,000,000 fund is planned for its subsistence of from five to 10 cents will be asked of Canadian and United States school children.

### Elected President

Chicago.—Charles H. Swift has been elected president of Swift International, succeeding Edward P. Swift, deceased. The action was taken at a meeting of the Board of Directors in Buenos Aires, Argentina. Alden B. Swift was made vice-president.

### Rumor Not Confirmed

No Declaration Regarding a Session Of Parliament In October

Ottawa, Ont.—Confirmation of the statement attributed to Dr. W. L. D. Cowan, (Cons., Long Lake), that a session of parliament would be called in October could not be secured here. The last word in that respect was the statement made by the Prime Minister in reply to a question by Rt. Hon. W. L. Mackenzie King in the House of Commons two days prior to his resignation.

Declaring he would regard it as his duty to communicate to the House any conclusion arrived at by the Imperial Conference, Mr. Bennett said he was not in a position to make any statement regarding the re-assembling of parliament until after the conference had concluded its labors.

### Was Ahead Of Schedule

First Inland Ship Reaches Churchill

London With Freight  
Churchill.—The first inland freight of the season arrived here July 12, when the motor sailing vessel "Fort Victory," loaded with fur, left the factory, Severn and Trout Lake. The ship is owned by the Hudson's Bay Company, Capt. O. Morris in command. Although heavy ice packs were encountered the schooner was not bothered, and arrived here two days ahead of schedule.

The ship loaded at midnight with supplies for far north outposts. The "Ocean Eagle," government trawler, is on ice patrol north of the harbor.

## BRITAIN AND FRANCE HAVE REACHED ACCORD

London, England.—Great Britain and France have agreed that in the future they will exchange views with complete candor on matters similar to those settled at the Lausanne Conference, Sir John Simon, secretary of state for foreign affairs, announced in the House of Commons.

For first of all, he said, they will cooperate in laying out the ground for a world economic conference.

And thereafter they will keep each other mutually informed on any questions coming to their notice which may affect Europe as a whole. "It is to be hoped," said Sir John, "that other governments will join us in adopting this procedure."

Sir John Simon, foreign secretary, surprised the House of Commons with the country with this announcement in the House.

He emphasized this agreement had no connection whatever with relations between France and the United States, specifically in respect to the war debts owed to America.

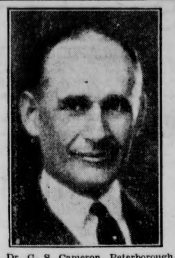

He thus made clear the accord was not to be confused with the "gentlemen's agreement" signed by Britain, France and Italy at Lausanne which will hold the Lausanne reparations settlement in abeyance until the United States has been heard from on the question of war debts revision.

### REACHES HIS 93rd MILESTONE

This most recent photo of John D. Rockefeller, founder of one of the greatest fortunes in United States industrial history, shows the aged oil king as he appeared with the Rev. J. H. Dearing, pastor of the First Presbyterian Church of Lakewood, N.J., when he attended service there recently. John D. looks spry and active despite the fact that on July 8th he passed his 93rd milestone.

### ON CANCER COMMITTEE

Dr. Q. S. Cameron, Peterborough, Ont., who is a member of the Advisory Committee on Cancer appointed recently to confer with the Ontario Government on any problem it considers should be brought to the attention of the legislating authorities.

### Peter Heenan At The Throttle

Again Takes Chair As Engineer Of C.P.R. Train

Kenora, Ont.—Employees at the Kenora Canadian Pacific Railway shop saw a familiar figure in an old role recently, when Hon. Peter Heenan, M.P., who was Minister of Labor in the Liberal Government of Right Hon. W. L. Mackenzie King, mounted the cab of No. 2 train to take charge as engineer from Kenora to Ignace.

Thirty years ago Peter Heenan first took up the throttle here as an engineer and this was only interrupted when he entered the political arena, first in the Ontario legislature and later in the Dominion Parliament when he joined the cabinet as Minister of Labor.

Now he returns to harness after a long absence, and nobody, not even Mr. Heenan himself, appears to object. It is just all in the day's work.

### Soviet Acreage Is Far Below Estimate

Nearly Millions Acres Less Under Cultivation This Year

Moscow, U.S.S.R.—Soviet Russia has wound up the spring sowing campaign with nearly 1,000,000 acres less than last year under cultivation. The total is nearly 15,000,000 acres below the programme.

Official figures place the total area sown on July 1 at 241,000,500, last year and 255,875,000 planned. Failure to come up to the expectations was attributed largely to the poor plowing of the Ukraine where a bad drought last year caused great loss of crops and seed.

### Seaplane Sinks

London, England.—A Royal Air Force seaplane with a crew of eight sank in the Irish Channel off Larnach, Antrim. Six of the crew were saved by the steamer "Nicoand," the two other members of the crew landing safely later on the Antrim coast, having paddled ashore in a rubber boat.

### Barter Agreement

Suggestion Made That Coal Vessels From Britain Would Take Back Wheat Cargoes

London, England.—The familiar suggestion that a barter agreement should be arranged between Britain and Canada so that British vessels taking British coal to Canada would secure cargoes of Canadian wheat was again made in the House of Commons by Mrs. Ida Copeland, Conservative.

L. Hore-Bellish, parliamentary secretary to the Board of Trade, said the suggestion was not practical. He had no information in regard to the nationality of the vessels in which either wheat or the 1,033,000 tons of British coal exported to Canada in the 12 months ending May 31 last, was carried, he said.

Mrs. Copeland asserted that most of the 30,000,000 bushels of Canadian wheat brought to Britain in the period mentioned were carried in foreign vessels.

### Back To Land Plains

Saskatoon Expects To Effect Big Saving In Relief Costs

Saskatoon, Sask.—Arlene Wilson, chairman of the committee in connection with the farm settlement scheme, reported to city council that a monthly saving in relief cost of \$4,770.40 would be effected, provided the 1,350 applications received the Induration of the provincial government. Of the applications made 211 were British, 28 naturalized Americans, 6 un-naturalized Americans, 33 foreign naturalized and 34 foreign un-naturalized.

Mr. Wilson in his report recommended that the regular sittings to interview applicants be discontinued.

### New Alberta Loan

Provincial Issue Steadily Gaining Prestige On British Market

Edmonton, Alberta.—Closing quotations on Alberta Government bonds, recorded on the London stock exchange, is taken as evidence here that the provincial issue is steadily gaining prestige in the British market. When the issue was first floated it received a cool reception.

"News of the gain received by the Alberta government bonds is very gratifying indeed," Hon. R. G. Reid, provincial treasurer, told the Canadian Press here.

## ST. LAWRENCE SEAWAY PLAN IS APPROVED

Ottawa, Ont.—Canada and United States have agreed on final terms for construction of the St. Lawrence deep waterways scheme. Simultaneously, this announcement was made in Ottawa and Washington. Preparation of the final plan under way and the document will be executed at an early date.

The United States Congress and Senate probably give the official approval of the agreement before work is started. The Canadian parliament likewise will have to approve the treaty.

Long anticipated, the official announcement broke simultaneously in Ottawa and Washington. In the whole gamut of world engineering the project will be second only to the Panama Canal. Described officially as a means of improving and cheapening transport for a large part of the North American continent, carrying out of the project will enable vessels now commonly plying on the Lakes to reach the sea. Alternately, ocean vessels will be able to penetrate the continent to the head of the Great Lakes.

Combined with great navigational facilities will be a very substantial power development. More than 3,000,000 horse power of electrical energy will be made available. Of this total, 2,200,000 horse power will be generated in the international section. Ontario will have the use of 1,300,000. The United States under the boundary waters treaty, will have the remaining 1,000,000 horse power. In the national or purely Canadian section lying in Quebec province, 3,000,000 horse power will ultimately be developed. The Beauharnois power project 30 miles from Montreal, will be utilized in the national section.

Thus—400 years after its discovery by Jacques Cartier—the St. Lawrence river by international action may go far towards revolutionizing transportation in Canada. Again, there will be the industrial activity contingent on the water power development.

## SETTLEMENT OF EUROPEAN DEBTS MUST BE MADE

Paris, France.—The French foreign office has published the text of the "gentlemen's agreement" by which the principal powers concerned in the treaty of Lausanne agreed not to ratify that treaty until each had obtained a satisfactory settlement of its own debts.

The agreement was initiated by Great Britain, France, Italy and Belgium. It also provides that the Lausanne accords shall not definitely go into force until they have been ratified as provided in the treaties themselves.

When a satisfactory arrangement has been made concerning their own debts, the gentlemen's agreement provided, the initiating governments will ratify the general accords with Germany and these will become effective. If it is found impossible to obtain a required settlement, it was agreed, the accord with Germany will not be ratified.

The foreign office also published the text of a letter received by Louis Germain-Martin, Minister of Finance from Neville Chamberlain, British Chancellor of the Exchequer, indicating that Great Britain agrees to the suspension of payment of France of her war debt annuities until the Lausanne accord goes into force or until it has been decided not to ratify it.

### The Union Jack

Question Of A Distinctive Canadian Flag Is Raised

Ottawa, Ont.—Under present regulations, the Union Jack is the flag of Canada on land and the Red Ensign on sea. This was the statement from the state department when informed of remarks attributed to Col. W. H. Price, Ontario Attorney-General, on the need for a distinctive Canadian flag.

For years there had been advocacy of a new flag for Canada, said Hon. C. H. Chan, secretary of state, but nothing had developed recently as far as he was aware.

The question of a distinctive Canadian flag has been the subject of discussion in the House of Commons at different times for several years past.

### Favorable Report

All Crops In West Continue To Make Good Progress

Montreal, Que.—All crops in the prairie provinces continue to make good progress states the weekly crop report from the Bank of Montreal. During the past week, rains have been again general and as moisture is ample, except in a few districts in Saskatchewan, warmer weather is now required.

Hail has occurred in some scattered districts of Saskatchewan and there has been considerable damage from wheat, timothy and grass from grass-hoppers in Manitoba, but the areas affected are not large. Pasture and the hay crop generally are good.

### Will Seek Loan

City Of Calgary Needs Money To Carry On Relief Expenditures

Calgary, Alberta.—The city of Calgary will seek a \$1,000,000 loan from the Bank of Montreal immediately. It has been decided by city council.

City finances were in dire need of bolstering. It was pointed out, and if the loan is obtained the city will be able to carry on its relief expenditures, aided by the promised \$250,000 support from the Dominion Government.

At present the city is in debt to the bank to the amount of \$170,000.

### Chaplin Files Protest

Los Angeles.—Charlie Chaplin, listed on the county assessment roll as the richest man in Hollywood, possessing taxable securities worth \$2,687,570, filed a protest with the county board of supervisors seeking to show his wealth to be highly inflated. His lawyers said the comedian's securities were worth but \$1,637,316 and asked for a re-assessment.

### French Aviator Crashes

Lyons, France.—On the last lap of a 4,700 mile flight, Colonel Gillemene was killed in a crash on the way from Venice to Le Bourget. Commandant Goslin, his companion, was fatally injured and died in a few minutes. They left Le Bourget on July 24 for a new tour to Budapest, Warsaw, Istanbul and Venice.

### Local & General

Mrs. J. Buchan of Stirling is visiting relatives here.

Mr. and Mrs. R. Long of Calgary were visitors in Champion last week.

Mrs. G. Fath is visiting at the home of her mother, Mrs. L. Schwartz, in Calgary.

Mrs. J. Walker of Carmangay was a guest at the home of her parents last week.

Mrs. W. R. McRae has been confined to her bed with a sprained ankle.

I. Fisher was unfortunate in losing three cows and a calf from eating grasshopper bait.

Mrs. Lamont and her mother, Mrs. Dobbs of Vulcan, are spending two weeks at Waterton.

The office of Dr. Heol will be closed from July 22 to July 31.

Miss Geraldine and Miss Helen Farmer are spending a holiday visiting friends at Trochu.

Miss Eva Latiff is spending a holiday, visiting relatives in Stavelay.

Miss Grace Genovese and Mr. Jack Giole visiting friends in town on Tuesday.

Mr. Fred Blachly of Vancouver is a visitor here looking over farming interests.

Sanford Anderson was a Lethbridge visitor on Friday.

Miss Dorothy and Rachel Crane are spending the month at Sylvan Lake.

M. F. Hamilton returned on Tuesday from a vacation spent at Yakima, Wash. Hammy reports an abundance of fruit in that vicinity.

Mrs. A. Lowe and son of Vulcan were guests at the party held in honor of Mr. Beaubien on Saturday evening. Friends of Mr. and Mrs. Lowe will rejoice with them in the fact that their little son is again able to be around and walking.

Mrs. McGillvary and son of Victoria are guests at the home of Mr. and Mrs. H. Gill.

Clayton Crane and Mr. and Mrs. C. E. Burke spent stampee week in Calgary visiting with their mother, Mrs. R. C. Crane.

Don't forget the Saturday site dance. The Rhythm Vendors will supply the music every Saturday night from now on.

Mr. Lamont, Mr. Staek and Mr. Dobbs of Vulcan left by car recently for a visit to the Peace River country.

Word has been received from the Department of Education that the practice of extending loans to Normal students will be discontinued this year.

Dr. H. N. Hoal and J. D. Henderson expect to leave by car for Militia Camp to be held at Brandon, Manitoba on July 22. They will be in camp five days, returning somewhere around July 30.

Mr. and Mrs. A. M. Watt and family have taken up residence in the house owned by I. Ditto. Mr. Watt is relieving Mr. Lamont while the latter is away on holidays.

Mr. and Mrs. A. McCullough motored to Calgary Wednesday returning Thursday with Miss G. Barrett, who is convalescing after her recent accident which resulted in a broken ankle.

Mrs. J. J. Goetz, Miss Mary Goetz, Miss Mabel and Leo of Calgary are guests at the home of Mr. and Mrs. Alex Goetz. They expect to return to Calgary Thursday taking Mrs. Alex Goetz with them and later leave for a vacation at Sylvan Lake.

A number of young girls gathered at the home of Miss Maxine Ditto on Thursday July 14, to celebrate her 13th birthday. The afternoon was spent in games after which dainty refreshments were served.

### Coach Excursion TO BANFF

\$3.50 from Lethbridge, Mazonia and intermediate points for the round trip.

Good in coaches train No. 543, July 30th connecting with Special train leaving Calgary 8:10 a.m. July 30th.

Return limit up to train No. 2 from Banff 10:35 p.m. Sunday July 31st.

CANADIAN PACIFIC

### Obituary

Vern Z. Lloyd, only son of Frank and Zora Lloyd was born in Goreville, Illinois August 24, 1900, and departed this life May 21, 1923, aged 31 years, 8 months and 27 days.

He resided in Goreville until 1910, when he went with his parents to Alberta and remained there until he was 18 years of age. He enlisted in the Canadian Army during the World War.

In 1920 he went to Gary, Indiana, where he obtained employment with the American Sheet and Tin Plate Co. By his honest and upright dealing he soon became foreman. This position he held until his death.

On October 24, 1923, he was united in marriage to Mildred Whitaker of Marshall, Illinois.

His illness was of an extremely severe character and of long duration, beginning at the youthful age of 14, through all these years he has borne it bravely and cheerfully. On March 17, he was taken to the Mercy Hospital in Gary, where it was thought his condition might be improved. After some improvement he again tried to fill his position as foreman, but his body was not strong enough to stand the responsibilities and again he was taken to the hospital and underwent a severe operation. All was done that skilled medical science could do but to no avail. On Saturday, May 21, at 1:30 p.m. he quietly passed away.

To his wife he was the embodiment of kindness and generosity; to his relatives liberal and obliging. His relatives and friends have manifested their appreciation of his goodness by the care and devotion during his illness.

He leaves to mourn his early departure a kind and loving wife, a mother, two sisters, Edna and Lucinda of Lethbridge, Alberta, an aged grandmother of Goreville, Illinois, and a host of relatives and friends.

Vern was a man with a remarkable disposition. He lived a life of utmost honesty and righteousness. He dealt squarely with everyone. He was a successful, ambitious, generous man, ever ready to give help to those who needed help, especially the unemployed. No one ever doubted the sincerity of his motives or the genuineness of his friendship. In early life he accepted Christ as his Savior. We say he is gone but the life he lived every day of honor and honesty remains with us.

Friends in this district extend their regrets to Mr. and Mrs. Lloyd and family in their bereavement.

The school trustees wish it to be known that they are agreeable to children using the school grounds and play ground equipment for recreation purposes, but they wish it to be distinctly understood that no interference must be made with, or damage done to any property belonging to the school district, otherwise this privilege may be withdrawn.

### Champion Consolidated School District No. 40

The trustees have fixed the following schedule for the operation of the train routes of the district: North East route \$3.75 per day, South East \$2.50 per day, Long South West \$3.75 per day, Short South West \$2.50 per day. Ratepayers in arrears for taxes will be permitted to operate a route application for less than one month will not be considered; applications to be in by 7:00 p.m. Tuesday August 9th, 1923.

Routes and rates to be subject to the revision of the trustees as conditions warrant.

TENDERS FOR COAL  
Tenders for the delivery to the school of 100 tons of screened coal, more or less will be received at the same time, delivery to be made as required. The lowest or any tender not necessarily accepted.

H. COOPER, Secretary

### Everybody Was Mad

(Contributed)

A young lady of Champion whom we all know  
Visited Lethbridge to see a baseball show.  
And while sitting there with her friends in the stand,  
She overheard a fellow-fan talking with his hands.

It is evident she knew by the motions of the man  
That he was acting peculiar for a baseball fan.  
So she said to her friends, "I am going to get his goat,  
For his sense of humor is gone or remote."

Our young lady from Champion went into a rage.  
It is hard to comprehend such a thing of her age.  
And after the game she was taken down some  
When she heard that the man was both deaf and dumb.

The town orchestra journeyed to Willow Creek on Saturday July 10 to play for a dance and camped over-night, returning Sunday night. The other boys accompanied them making nine in all. All the boys enjoyed themselves thoroughly and it is hoped that they will be able to do the same on a future date.
